Dario Gjorgjevski

★ Kruševska № 21 • 2320 Delčevo • Republic of Macedonia

□ dario.gjorgjevski@gmail.com (+389) 72 215 992

Education

Ss. Cyril and Methodius University

2013-09-15/2018-01-30

Computer Science and Engineering, 10.00/10.00 GPA

Bachelor's degree

Strong background in linear algebra, statistics, stochastic processes, compilers, machine learning, and cryptography. Bachelor's thesis: "Error-Correcting Codes in the Rank Metric (With Applications to Cryptography)", supervised by prof. Simona Samardjiska.

Over 40 Massive Open Online Courses on such subjects as: game theory, probabilistic graphical models, combinatorics, and programming language theory. See here for a full list of certifications.

Experience

Infinite Analytics, Inc.

2017-11-20/

Data Science

- Scraping of clients' websites and product catalogs using Scala/Akka and Python/Scrapy.
- Dynamic upstream configuration with persistence across restarts using NGINX Plus.
- Acquisition, monitoring, and analysis of server utilization data using Python, the Elastic Stack, NGINX Plus, and Google Stackdriver.
- Consumer insights using Apache Spark (Scala and Python).

École polytechnique fédérale de Lausanne Laboratory for Communications and Applications 2 2017-07-07/09-20

Research Internship

Worked under the supervision of Jagdish Prasad Achara and prof. Jean-Yves Le Boudec on:

- T-RECS: A Software Testbed for Multi-Agent Real-Time Control of Electric Grids. I implemented new functionality and fixed bugs using Python and Mininet.
- Modeling of smart grid power traces at a timescale of 20 ms using approaches based on wavelets and long-range dependence—as well as deep learning.

Ss. Cyril and Methodius University

2016-10/2017-02

Faculty of Computer Science and Engineering

Computer Laboratory Assistantship

Full responsibility for computer laboratory exercises and homework assignments in:

Linear Algebra Least squares, linear codes, and low-rank approximations using

Mathematica® and SAGEMATH.

Probability and Statistics Data visualization, Monte Carlo methods, inference, hypothesis

testing, and linear regression using R.

Databases ER modeling, relational algebra, and ANSI SQL.

Worked under the supervision of Sonia Bogos and prof. Serge Vaudenay on the *Learning With Errors* (LWE) problem. I studied and built upon state-of-the-art algorithms to improve their complexity.

Honors and Achievements

- Best student paper at the 14th International Conference on Informatics and Information Technologies held on April 7–9, 2017 in Hotel Bistra, Mavrovo, Macedonia.
- Scholarships to attend the 2016 and 2017 editions of the Summer School on Real-World Crypto and Privacy held in Šibenik, Croatia.
- Dean's list at the Faculty for Computer Science and Engineering throughout the entire duration of study.
- Merit-based scholarships from the Faculty of Computer Science and Engineering, the Ministry of Education and Science of Macedonia, and the Municipality of Delchevo.

Computational Skills

Programming Languages - Fluent in: Python, C/C++, Java, Bash, R, Mathematica[®].

Familiar with: Scala, SQL, Common Lisp, Emacs Lisp, Racket, Lua,

Haskell, Standard ML, JavaScript.

Operating Systems - GNU/Linux (Arch Linux and Debian).

Text Editors and IDEs - GNU Emacs and IntelliJ IDEA.

Document Preparation - (IA) T_EX .

Version Control – Git.

Miscellaneous – Proficient using: the Elastic Stack (Elasticsearch, Kibana, Logstash,

and Beat), Ansible, NGINX, and the Apache HTTP Server.
