Dario Gjorgjevski

⌂ Kruševska № 21 • 2320 Delčevo • Macedonia

▣ dario.gjorgjevski@gmail.com   (+389) 72 215 992

Education

Ss. Cyril and Methodius University	2013-09-15/2018-01-30
Faculty of Computer Science and Engineering	Skopje, Macedonia
Computer Science and Engineering	Bachelor's degree

GPA of 10.00, scale from 5 (E/F) to 10 (A)

Strong background in linear algebra, statistics, stochastic processes, compilers, machine learning, and cryptography. Bachelor's thesis on code-based cryptography, titled "Error-Correcting Codes in the Rank Metric (With Applications to Cryptography)" and supervised by prof. Simona Samardjiska.

> Over 40 *Massive Open Online Courses* on topics related to game theory, probabilistic graphical models, Bayesian statistics, combinatorics, programming language theory, mathematical optimization, etc.
>
> Certifications available at https://github.com/d125q/Personal/tree/master/Certifications.

Experience

Segment of One	2018-07-18/
Data Engineering	Berlin, Germany

- Modeling clients' business rules as *minimum-cost flow* problems.
- Developing internal ETL tools and processes; implementing *change data capture* for heterogeneous data sources.
- Scaling of feature calculation and predictive analytics to terabytes of data inside a Vertica cluster.

Infinite Analytics, Inc.	2017-11-20/2018-06-15
Data Science/Engineering	Skopje, Macedonia

- Scraping of clients' websites and product catalogs using Scala/Akka and Python/Scrapy.
- Dynamic configuration of upstreams with persistence across restarts in NGINX Plus.
- Acquisition, monitoring, analysis, and visualization of server utilization data.
- Behavior-driven development of a Scala/Apache Spark program to compute and visualize *customer insights* using over 2 billion facts about 50 million customers.

École polytechnique fédérale de Lausanne	2017-07-07/09-20
Laboratory for Communications and Applications	Lausanne, Switzerland

Research Internship

Supervisors: Jagdish Prasad Achara and prof. Jean-Yves Le Boudec

- Implementing software agents (`asyncio`) and network emulation (Mininet) in T-RECS, a *Software Testbed for Multi-Agent Real-Time Control of Electric Systems*.
- Time series modeling of smart grid power traces at a timescale of 20 ms using approaches based on wavelets and long-range dependence.
- Increasing the resolution of mean-aggregated data using deep learning for super-resolution.

(Typeset on 2018-11-28)

Ss. Cyril and Methodius University 2016-10/2017-02
Faculty of Computer Science and Engineering Skopje, Macedonia
Computer Laboratory Assistantship

Full responsibility for conducting computational exercises and homework assignments in:

Linear Algebra	Least squares, linear codes, and low-rank approximations with Mathematica and SageMath.
Probability and Statistics	Data visualization, Monte Carlo methods, statistical inference, hypothesis testing, and linear regression with R.
Databases	ER modeling, relational algebra, and ANSI SQL.

École polytechnique fédérale de Lausanne 2016-06-15/09-15
Security and Cryptography Laboratory Lausanne, Switzerland
Research Internship
Supervisors: Sonia Bogos and prof. Serge Vaudenay

Studying and improving upon the complexity of state-of-the-art solving algorithms for the *Learning With Errors* (LWE) problem.

Honors and Achievements

- Best student paper at the 14th International Conference on Informatics and Information Technologies held on April 7–9, 2017 in Hotel Bistra, Mavrovo, Macedonia.

- Scholarships to attend the 2016 and 2017 editions of the Summer School on Real-World Crypto and Privacy held in Šibenik, Croatia.

- Dean's list at the Faculty for Computer Science and Engineering.

- Merit-based scholarships from the Faculty of Computer Science and Engineering, the Ministry of Education and Science of Macedonia, and the Municipality of Delčevo.

Skills

Programming and Computation

Proficient with	– Python	– NumPy, SciPy, Pandas, scikit-learn, Keras, Scrapy, NetworkX.
	R	– tidyverse, mlr, caret, interfaces to JAGS and Stan.
		Packages for time series analysis, network analysis, text mining.
	SQL	– Vertica, PostgreSQL, Redshift.
	Shell	– sh, Bash, Zsh.
	CAS	– Mathematica, SageMath.
	(D)VCS	– Git.
Familiar with	– Scala, C, C++, Java.	
Academic exposure to	– various Lisps, Haskell, Standard ML.	

Document Preparation

- (LA)TeX, Jupyter, Sweave/knitr, Wolfram Notebooks.

- Matplotlib, Ti*k*Z/PGF, PSTricks, ggplot2, gnuplot, Graphviz.

Publications
